

Project Firstline Infection Control Training

News Release Date

04-14-2023

Montgomery Township Health Department is a proud partner of the CDC's Project Firstline, a collaborative of public health, healthcare, and academic partners focused on providing innovative and effective infection control resources to frontline healthcare workers. Project Firstline's new educational resources are designed to help healthcare workers think critically about infection control. When you learn to recognize infection control risks, you can take action to protect your patients and

yourself, no matter the situation. [Learn more](#)
